heating + cooling therapy
when and where you need it most

convenience. compliance.

The Ice Age Is Over!
No more ice, no more hydrocylators.

Broad Temp. Range
20 controlled temp settings from 34°–125°F.

Smaller by Design
Lighter and smaller for easy portability.

Motion Advantage Pads
Targeted therapy for maximum healing.

Consistent Temp.
5 preset timer options; maintains temp as long as you need it.
The ThermaZone® Advantage

ThermaZone is a powerful and practical pain relieving device that uses thermoelectric technology to provide heating and cooling therapy where and when you need it, without the use of ice. Our technology satisfies a clear un-met clinical need - safe, effective, and targeted localized treatment with precise temperature management and registration.

Consistent Temperature Delivery

Traditional ice-water circulating devices as well as ice and gel heat packs do not maintain consistent temperatures over time. These therapies can start off too cold or too hot, causing injury or discomfort and will quickly lose their therapeutic effectiveness as they adjust to room temperature.

The Importance of Patient Education

How cold is cold enough?
Many patients have pre-conceived ideas that cold therapy has to be as cold as ice to be effective.

In reality, the over use and exposure to ice and low temperatures can lead to serious injuries. Blood vessels close to the skin start to constrict, and can shunt blood flow away from an injury and damage tissue in the affected area, opposite of the intended therapy and its benefits.

Because ThermaZone is easy to use, safe and maintains a consistent temperature, patients are more likely to comply with prescribed treatment. Patients can experience reduced need for pain medication and improve their recovery time.

Advantages of ThermaZone Continuous Thermal Therapy

There is variation in the sensitivity to temperatures experienced by different people. The right temperature for the maximum healing benefit is key in patient care.

As a professional it is important that patients receive proper instructions and personalized therapy guidelines for use, duration and frequency. ThermaZone allows you to customize your treatment through 20 temperature levels for precise thermal therapy.

Delivered Temperature

ThermaZone has 20 temperature comfort levels allowing professionals to prescribe specific treatment duration, intervals and temperature levels for maximum healing benefit.

Note: Temperatures are approximate and can vary ± 3° F depending on pad style, ambient temperature and pad body placement.

* The device has a maximum regulated temperature of 125° F.
The ThermaZone Continuous Thermal Therapy System is ideal for virtually any profession that uses heating and cooling therapies. Our lightweight, portable and affordable solution is perfect for in-clinic as well as at-home use for pain relief, injury treatment and surgery recovery.

- Orthopedics
- Physiotherapy and Rehabilitation
- Sports Medicine
- Neurology
- Long-term care / Home Health
- Pain Management
- Chiropractics
- Plastics, Reconstructive and Aesthetic Surgery
- Obstetrics and Gynecology

For Orthopedics

ThermaZone Continuous Thermal Therapy along with the Single Patient Use Pads in the hospital are an efficient way to administer therapy post-surgery. Treatment can be applied immediately in the recovery room and continued in the patient’s room to manage pain and swelling. ThermaZone runs without the use of ice, operates on 2 ounces of distilled water and is virtually maintenance free. Nursing staffs love the convenience. No wet dripping ice that dampens bedding or ice buckets to frequently reload. The unit is portable enough to take home to continue use throughout recovery. Physicians can be confident their patients are provided with consistent, controlled therapy to speed recovery.

For Sports Medicine

The best technologies shouldn’t be limited to a clinical setting. Athletic trainers can leverage ThermaZone Continuous Thermal Therapy to effectively manage acute injuries on the road and maintain a safe, efficient training room. Ice machines run continuously and require maintenance. Hydroculators can take up to 3 hours to heat and can be dangerous. Now there is a device that can be personalized to an athlete’s needs, shorten recovery time and get them back to activities as quickly as possible.

Compelling Features

- Runs without the use of ice and is virtually maintenance free
- 3 minutes to set up, requires only 2 oz. of distilled water
- Five preset timer options:
  - Timed therapy: 10, 20 or 30 minutes
  - Continuous therapy: 30 minutes on and 30 minutes pause or 30 minutes on and 60 minutes pause
- Lightweight and portable
  - Unit Size: 11" L x 4.5" W x 4.5" H
  - Unit Weight: 3 lbs. 7 oz.
ThermaZone® Relief Pads

ThermaZone Relief Pads have the water delivery system welded directly into the pad for the perfect fit and conformance to every part of the body. Pads are made of a soft, flexible, latex-free material for maximum comfort and are designed to meet the variability in patient shapes and sizes.

ThermaZone® Relief Pads (Reuseable)

Individual pads work in conjunction with the ThermaZone Continuous Thermal Therapy technology and are interchangeable with the unit. Pads are universal and fit right or left side.

ThermaZone® Relief Pads (Disposable)

Durable, yet disposable to prevent the transfer of germs and bacteria. Pad interior is coated plastic which helps prevent fluid transfer and contamination.

Accessories

- 003-03 Auto Power Cord
- 003-04 Tubing Assembly
- 003-05 Carrying Case (holds unit and 4 pads)

Also Available

- 003-30 Shoulder Relief Pad Fits up to a 54" Chest
- 003-28 Back Relief Pad
- 003-27 Knee Relief Pad
- 003-29 Ankle Relief Pad
- 003-43 IV Pole with Basket
- 003-79 Hospital Bed Bracket
